COMPANY PROFILE

AL SEHMIAH CEMENT PRODUCTS is established in the year 2007 as a specialized company in the production of cement products namely Hollow blocks, Solid blocks, Insulated blocks, Kerbstones, Concrete tiles, Shot blasted tiles and Interlocking pavers. Al Sehmiah cement products has established and applies an environment management system and a quality management system for Design, Manufacture and Supply of Engineered Concrete Masonry units, Kerbstones, Concrete Tiles and Interlocking pavers for construction sectors and has achieved ISO 14001:2015 and ISO 9001:2015 certification and most of our products has attained conformity certification from Ministry of Environment Qatar.

To guarantee that our company provides state-of-the-art technology and services we have established with leading European technology to produce high quality products, exceeding customer expectations and maintaining high ethical standards. The organization is managed by a group of well expertise professionals. Production is controlled by a group of professionally qualified well expertise / well experienced engineers and technicians.

This well expertise staff strictly monitoring the production process to ensure the quality of the finished products. The quality of the cement, aggregates, sand etc. are continuously monitored by the quality controlled team. The curing of the casted products are achieved by the uniform circulation of the hot and humid air by a heavy duty circulating fans which are operating inside the curing chamber. We set up an in-house laboratory for the continuous checking of compressive strength of finished products. Random selection of samples from the cured finished products is carried out at the dry side for testing compressive strength. We are committed to use leading edge and innovative technology for our products.

We offer an uncompromising service from qualified support staff through to order fulfilment. Al Sehmiah is 100% employee-owned which means each and every employee has a vested interest in the success of the company. Our commitment to client satisfaction strengthens and extends our relationships.

Our company constantly conducts research to predict market trends and absorbs feedback from the customers. Constantly increasing sales for the last 13 years demonstrates that this strategy has been successful in providing the customers with the latest market requirements.

Al Sehmiah has concentrated on Hollow blocks, Solid blocks, Insulated blocks, Kerbstones, Concrete tiles, Shot blasted tiles and Interlocking pavers of large format that are well suited for the commercial sector, and is also constantly meeting the needs of the residential sector with great customer satisfaction reviews.

MESSAGE FROM THE COMPANY MANAGEMENT

To build Al Sehmiah team into the most leading manufacturer in Qatar by:

- * Producing the highest quality products
- * Maintaining the highest ethical standards
- * Becoming inevitable partners to Contractors and Clients by enhancing their profitability and success.

We understand the importance of integrity and commitment to the client and believe that success comes from having a long-term vision, especially when it comes to build long term relationship.

We have an obligation to our Clients, Customers and Employees to operate in an ethically and socially responsible manner. Our primary emphasis is on product quality and service, the protection of environment and the safety of our employees and community.

I am looking forward to being the leader of a company that helps to create such positive and excellent services for our customers. I am proud to be part of an energetic team that is dedicated to serving the company to achieve its goals and targets.

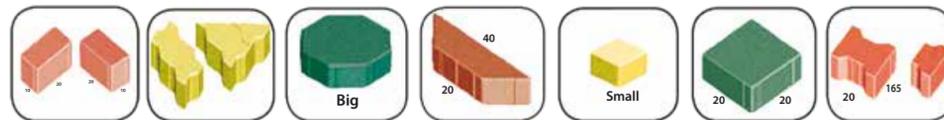

Our mission is to be a part of Qatar Government to fulfil their dream for Vision 2030.

CONCRETE PAVERS

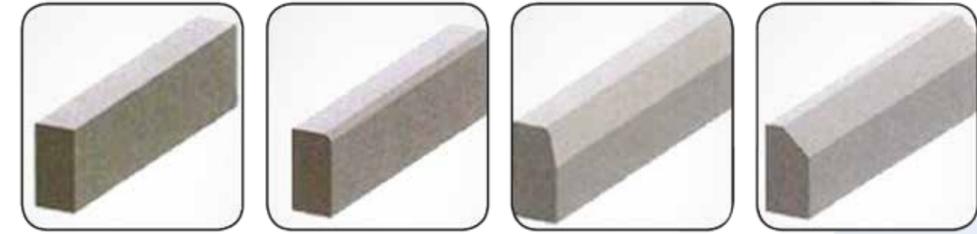

Concrete pavers are actually a manufactured product, colors are introduced during the manufacturing process to produce a wide range of strong, bright colors that resist sun and fading. Manufactured pavers are interlocking, which makes them particularly easy to install. Lay them side by side to create neat borders that separate your lawn and garden or stack them in a low wall to make a raised bed. Custom colors and finishes are also available. The range of paver thickness vary from 60 mm to 120 mm.

INTERLOCKING CONCRETE PAVERS

ITEM	THICKNESS (MM)
Rectangular shape 200x100	60
	80
	100
	120

Pavers 500x250	60
	80
Pavers 600x300	60
Pavers 400x200	60
Pavers 300x300	60

KERBSTONE

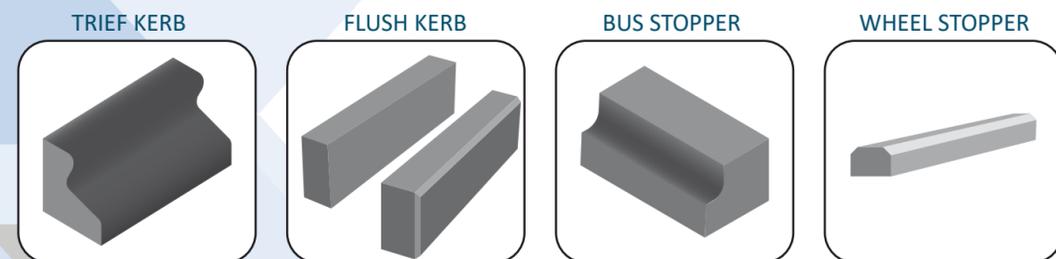

Road kerb serve a number of purpose:

- * Retaining the carriageway edge to prevent spreading and loss of structural integrity
- * Acting as a barrier or demarcation between road traffic and pedestrians or verges
- * Providing physical check to prevent vehicles leaving the carriage way
- * Forming a channel along which surface water can be drained

THERE ARE MANY DIFFERENT TYPES OF ROAD KERBS

All standard sizes includes 914x305x50...150; 914x255x50...150; 914x400x50...150; 914x150x50... 150 available

HOLLOW AND SOLID BLOCKS

This large rectangular-shaped block is made by casting concrete out of cement (usually portland cement) mixed with an aggregate made of different materials, depending on what density a particular block is intended to be. High-density hollow blocks, for instance use an aggregate made from fine gravel and sand.

The hollow block is referred to as such because of its appearance, as it is manufactured with hollow centers designed to improve insulation and reduce its weight. The function of the holes in the block is to enable reinforced concrete (concrete and rebar or reinforced steel) to vertically run through it, thus making up for what it lacks in tensile strength.

Insulated blocks/fire resistant blocks have more than six times better insulation coefficient than normal hollow blocks

HOLLOW BLOCKS

SIZE (mm)
400X200X100
400X200X150
400X200X200
400x200x300

SOLID BLOCKS

SIZE (mm)
400X200X100
400X200X150
400X200X200
400x200x300

INSULATED BLOCKS

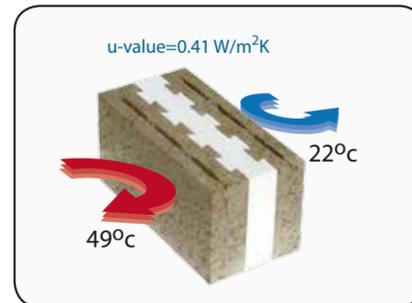

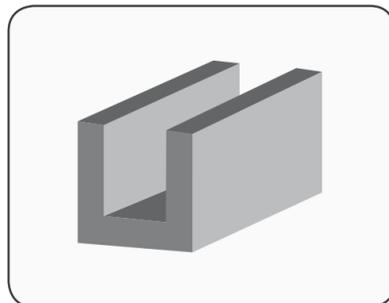

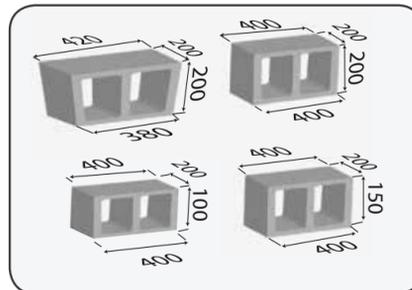

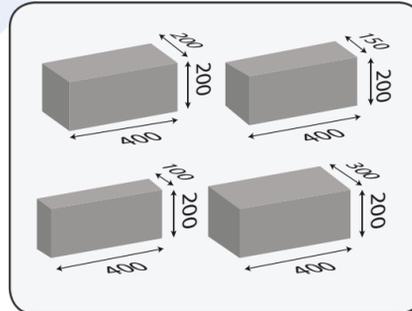

SIZE (mm)
400X200X200
400X250X200
400X300X200

HOURDI BLOCKS

SIZE (mm)
420/380X200X200

U BLOCKS

SIZE (mm)
400X200X200

LIGHTWEIGHT BLOCKS

Light weight masonry units are upto 40% lighter than normal concrete blocks, creating lesser load on building. Better thermal transmission co-efficient of the light weight blocks result in low energy loss.

HOLLOW BLOCKS

SIZE (mm)
400X200X200
400X200X150
400X200X100

HOURDI BLOCKS

SIZE (mm)
420X380X200x200
420X380X250x200
420X380X300x200

CONCRETE ROOF PAVERS / SHOT BLASTED TILES / GRINDED / POLISHED PAVERS

Al Sehmiah Cement Products manufactures Concrete Tiles, Concrete Roof Pavers, Grinded Pavers, Tactiles and Shot Blasted Tiles. All standard sizes are also available. Concrete tile vary in the manufacturing process from dry pressed to wet cast in moulds
